ABSTRACT

The 1987 Directory provides information about 1,165 special education personnel preparation programs in the United States and its Trust Territories. Programs to prepare personnel as teachers, special education administrators, speech-language pathologists, audiologists, physical therapists, occupational therapists, and adaptive physical educators are included. The directory is organized alphabetically by state, and within each state those colleges and universities which offer certification or degree programs in special education are listed in alphabetical order. A coding system is used to identify program level (such as undergraduate certification, graduate certification, Bachelor's degree, and Master's degree) and areas of preparation (such as audiology, administration, emotional disturbance, mental retardation, physical therapy, speech language pathology, occupational therapy, hearing impairments, and gifted). In addition to the coded information, each listing provides an address and phone number. Information was gained as a result of a survey of the programs in the spring of 1986. (DB)

# Preface

## Purpose and Organization

This Directory is designed to provide information about special education personnel preparation programs in the United States and its Trust Territories. The Directory expands and updates the 1983 National Directory Of Special Education Teacher Preparation Programs. The 1983 Edition of the Directory contained information about 698 programs, most of which focused on the preparation of special education teachers. The 1987 Edition contains information about 1,165 programs. Entries include programs that prepare special education personnel in all areas: teachers, special education administrators, speech–language pathologists, audiologists, physical therapists, occupational therapists, and professionals who provide adaptive physical education services.

The Directory is organized alphabetically by state, and within each state those colleges and universities which offer certification or degree programs in special education are listed in alphabetical order. A key is provided at the beginning of each state listing which explains the coding system for the different degree levels and areas of preparation. Because terminology and classification systems relating to the different special education categories vary widely from state to state, a decision was made to develop and use codes that corresponded to the terminology used in that state's certification system. Wherever possible, certain coding conventions were used across states, as follows:

A = Audiology
AD = Administration
APE = Adaptive Physical Education
OT = Occupational Therapy
PT = Physical Therapy
SLP = Speech–Language Pathology

Limited contact information is provided about programs that did not respond to requests for information.

Information contained in the Directory has been entered into a database which enables the generation of mailing labels sorted according to the different preparation areas and/or degree levels. Sets of labels can be purchased at a modest cost. Descriptions of the various mailing lists, procedures for requesting a customized search, and price information can be obtained by contacting the TED Dissemin/Action Program, Products Center, 9618 Percussion Way, Vienna, VA 22180. Proceeds from the sale of the labels will be used by the Teacher Education Division of the Council for Exceptional Children to support their efforts to improve the preparation of special education personnel.

## Procedures

The information contained in this Directory was obtained through a nationwide survey of colleges and universities that offer special education personnel preparation programs. The survey was conducted by a committee established for this purpose by the Teacher Education Division of the Council for Exceptional Children. Committee members included: William Geiger at the University of Arkansas at Little Rock; A. Edward Blackhurst, LuEllen Doty and Pamela Smith at the University of Kentucky; Paul Lauritzen at the University of Wisconsin–Whitewater; and Sandra Lloyd at Indiana State University.

Questionnaires were sent to 1,165 programs during the Spring of 1986. Follow–up letters were sent to non–respondents in June 1986. Attempts were made to contact programs that did not respond after the second mailing. When phone numbers were available, efforts were made to make telephone contact with non-respondents. Responses were received from 1,110 programs for a return rate of 95.7 percent. Data were not received from 55 programs; however, the addresses of those programs are included in the Directory, followed by the notation, "No Information About Program."

Staff at the National Information Center for Children and Youth with Handicaps, (NICHCY), under the directorship of Delores M. John, designed the layout and made arrangements for the printing and distribution of the final document.

Although every effort has been made to ensure accuracy of the information presented in the Directory, it is almost inevitable that some errors have occurred in interpreting handwriting, coding information, entering date or proofreading. Errors should be drawn to the attention of A. Edward Blackhurst, Department of Special Education, 229 Taylor Education Building, University of Kentucky, Lexington, Ky 40506-0001. Corrections will be made in any future printing.

# ACKNOWLEDGEMENTS

The production of this Directory was truly a team effort. The major contributors were documented in the previous section. As with much of the research in special education, the success of this Project was highly dependent upon the contributions of graduate student assistants and clerical personnel. On behalf of the Teacher Education Division of the Council for Exceptional Children, we wish to acknowledge the excellent contributions of the following people: Peggy Waluk at Indiana State University; Rene Hales, Sharon Hutchinson, Judy Knauss, Lin Kotowicz, Jan Weber, and Laura Zamarron at the University of Kentucky; Lisa Michaelsen and Chris Ray at the University fo Wisconsin–Whitewater; and Carol Rewers (intern), publications specialist at the National Information Center for Children and Youth with Handicaps.

We also wish to acknowledge the very significant financial contributions made by our respective universities. Services of the people previously mentioned were donated, as were the costs of duplicating questionnaires, envelopes, postage, telephone charges, and computer access. We hope that these contributions and our efforts have resulted in a document that will be useful to current members and prospective members of the special education profession.
